Portfolio:

hitesh-portfolio-beast6713s-projects.vercel.app

SKILLS

Languages:

Python, Go, C++, TypeScript, JavaScript, HTML5/CSS3, Bash

Frameworks:

React.js, Next.js, Node.js, Express.js, Flutter

Database & Cache:

PostgreSQL, Redis, MongoDB, MySQL, Supabase, SQLite

Tools/Platforms:

Git, GitHub, Docker, Docker Compose, Linux, AWS, Postman

Security & Forensics:

Digital Forensics, NTFS Analysis, Wireshark, Port Scanning, OWASP Top 10

EDUCATION

SRM IST, Chennai, TN

B.Tech CSE (Cybersecurity)

GPA: 9.52/10 | Expected: May 2028

Coursework: Network Security, OS Kernel Internals, DSA, OOP, PostgreSQL, Digital Forensics, Web Architecture.

ACHIEVEMENTS

- 3rd Place:** Capture The Flag (CTF) Cyber Security, SRM IST
- Participant:** Smart India Hackathon (SIH) 2025
- Participant:** VITAP Hackathon 2026

PROFESSIONAL SUMMARY

Detail-oriented CSE student specializing in Cybersecurity and Full-Stack Development. Proficient in building high-performance, secure software engines, digital forensics utilities, and modular web applications.

PROJECTS

1. PortFootprint – Concurrency TCP Port Scanner & Fingerprinter

- Programmed a multi-threaded Python TCP scanner reducing scan latency by 60%+ with structured JSON/CSV/HTML reporting.

Tech Stack: Python, Socket Programming, Multithreading, JSON/CSV/HTML.

2. IP-Sentinel (IP Intelligence Platform)

- Built a high-performance Go backend with concurrent API workers and Redis caching for real-time threat intelligence.

Tech Stack: Go, Next.js, TypeScript, Redis, PostgreSQL, Docker, Tailwind CSS.

3. HTTP Security Assessment Framework (v2.0.0)

- Engineered a 10-phase CLI security engine with Playwright browser checks, safety policy rules, and OWASP ZAP API integration.

Tech Stack: Python 3.12+, Playwright, OWASP ZAP, Pytest, Rich CLI.

4. NTFS Forensic Recovery Tool

- Programmed a standalone Python parsing tool to directly scan raw disk MFT records and carve deleted file runs.

Tech Stack: Python, Digital Forensics, Binary Parsing, NTFS Internals.

5. Velocity Builder – Website Builder

- Built a React layout engine featuring state history tracking (Undo/Redo) and Netlify API for instant page publishing.

Tech Stack: React.js, Vite, Tailwind CSS, Netlify API, DnD Kit.

6. Royal Stitch Market – Multi-Vendor Marketplace

- Designed a Supabase marketplace with secure Clerk role authorization (Customer vs Tailor) and Zod input sanitization.

Tech Stack: Next.js, TypeScript, Supabase, PostgreSQL, Clerk, Cloudinary.

7. VulnReconX – Cybersecurity Scanning Framework

- Engineered a modular scan framework separating scanner orchestrators from plugins via SOLID design and YAML registries.

Tech Stack: Python, Pytest, PyYAML, SOLID Principles, CLI Routing.

TECHNICAL HIGHLIGHTS

Cybersecurity & Secure Systems:

- Proficient in Clean Architecture and Secure Software Development Lifecycle (SSDLC) patterns.
- Experienced in network diagnostics, packet auditing (Wireshark/TShark), and custom socket scanner engineering.

Full-Stack & Concurrency:

- Skilled in multi-threaded programming, asynchronous workflows, and Redis cache optimization layers.
- Adept at implementing secure Clerk/Supabase user authentication and role-based access control (RBAC).
